

PRAIRIE COLLEGE

CAMPAIGN FOR GREATER IMPACT

\$22.4 M

New Residence

Building attractive new student residences will significantly improve our on-campus quality of life for students, and enhance student retention and recruitment. Residences will be equipped with elevators and living spaces designed for special needs students.

\$8.5 M

(\$4.25 M
from MAF)

Expand Prairie Aviation Training Centre

Prairie's aviation program has grown exponentially and our partnership with Mission Aviation Fellowship of Canada (MAF) has made this program a remarkable success. The expansion of our hangar facility to include more space for classrooms, simulators, and maintenance facilities will enable us to double our annual intake of pilots and mechanics in training.

\$8 M (est.)

New Cafeteria and Concourse

The present Dining Hall is simply too large and is under-utilized. By building a new, smaller cafeteria, which would incorporate and upgrade the present kitchen, Prairie can provide an improved experience for students at a greater cost-efficiency. To connect these updated facilities together, a concourse space will be built onto the front of the new Dining Hall, Auditorium, and connect to Kirk Chapel, Parable Place, and the Maxwell Centre.

\$6 to \$8 M
(est.)

New Auditorium in Renovated Dining Hall

Prairie urgently needs a new Auditorium and worship space to replace its present auditorium. By building a new Cafeteria, Prairie will be able to repurpose the present Dining Hall into a New Auditorium. This modernized gathering space would accommodate up to 750 people and draw the Prairie community to God in personal and corporate worship.

\$4 M

Campus Infrastructure Upgrade

As Prairie's campus buildings are renewed, our sidewalks, parking lots, roads and green spaces will be creatively improved to present a welcoming "harmonized" campus.

\$3+ M

Scholarships, Innovative Technology & Program Development

Renewing infrastructure to provide the highest quality of on-campus life for students is crucial for future success. Prairie needs to significantly expand scholarship and bursary funds for new and returning students. Expansion of HyFlex capabilities to all classrooms is essential. Hyflex allows Prairie to be borderless - students can video into real-time classes from anywhere in the world. Prairie needs to continue developing new career programming tracks.
